

CONERGY

Conergy at a Glance

Conergy is driving today's clean energy economy with its quality solar photovoltaic (PV) solutions for homeowners, businesses and utilities. With operations in more than forty countries on five continents, Conergy is one of the world's largest companies solely dedicated to solar energy. For over a decade, Conergy has successfully deployed projects totaling over 1.5 gigawatts of renewable energy capacity around the world and has successfully served more than 10,000 customers.

Founded in Germany – The world leader in Photovoltaics

It's no coincidence that Conergy has its roots in Germany. Strong federal policy implemented more than a decade ago has resulted in Germany accounting for more than 50% of all the solar electric power capacity in the world. These policies led to entrepreneurship, innovation and business leadership that is a model for solar energy development elsewhere. The global strategy Conergy pursues is one based on local expertise and local solutions, to ensure that we remain close to our customers and partners and provide tailored solutions in all the markets we serve.

Strong leadership

Conergy is a global leader in photovoltaic system manufacturing, project development and PV plant operation as well as wholesale distribution. We are proud to:

- Be the world's only manufacturer of all major PV system components including modules, mounting systems, inverters and monitoring systems, ensuring built-in quality and efficiency.
- Have engineers with many years of experience in building some of the world's largest, most complex and state-of-the-art photovoltaic systems – and have thousands of these systems currently in operation worldwide.
- Partner with only the most experienced and knowledgeable dealers and installers with years of experience in solar installation and in-depth product knowledge. Conergy supports its partners through its highly trained Technical Services and Support staff providing comprehensive consulting, planning, financing and monitoring services.

Conergy is headquartered in Hamburg, Germany with North American headquarters in Denver, Colorado and Edmonton, Alberta. Today Conergy has over 1,700 employees throughout the world. Conergy AG is listed on the Frankfurt Stock Exchange.

High growth rates

During the past five years, North America has seen unprecedented growth in the number and scale of solar electric projects. In fact, the year over year growth rate in the U.S. has averaged more than 30% and is predicted to remain at that level well into the foreseeable future. While in Canada, the solar energy market has experienced large growth thanks to FIT and local content requirements in Ontario. Conergy is well-positioned in the marketplace with its large partner network, expert engineering, a local track record and premium product portfolio.

Conergy Worldwide

1.5GW of solar energy deployed

1GW of mounting systems sold

500MW of solar parks

12 years of PV experience

18 years of mounting systems experience

5 continents

40 countries

24 branches

1700 employees

Conergy North America

5 offices

100 local employees

3 module and mounting systems production sites

2 Ontario FIT compliant production facilities

Conergy Manufacturing

1 state-of-the-art module factory

250MW of PV capacity annually

3100 modules produced daily

1 inverter production facility

2 mounting systems manufacturing facilities

750MW of mounting systems production capacity
